LATEST NEWS

Immediate start on the construction of the provincial university building in Point Grey, municipality, close to Vancouver, will be made by the British Columbia government, Premier John Oliver announces.

At a meeting of Conservatives of Halifax city and county, held Wednesday night, a committee was appointed to consider the advisability of nominating a candidate to contest the Halifax seat in the by-election of December 4.

Serious consideration is being given by the Ontario provincial prisons department to the advisability of arming Guelph guards as a result of Tuesday night's escape of five inmates.

A suggestion that the unity of the empire might be furthered by a study of the financial problems of all parts of the British dominions even more than talk of imperialism was made at Toronto, Wednesday night, by Prof. C. E. Fay, of the University of Toronto, before the Toronto Bankers' Educational association.

Plans for financial support to aid the Soviet government of Russia to re-establish its textile industry, as proposed by the Amalgamated Clothing Workers of America, was made at a meeting of Socialists held at Hamilton, Ont., Wednesday night.

The successful results in the removal of the embargo against Canadian cattle in Britain were achieved because the British people were appealed to instead of the British government, Manning, secretary, minister of agriculture in Ontario, declared in an address at East Kent, Wednesday night.

The branch of the Union Bank of Canada at Victoria, B.C., was destroyed by fire at 6.30 Thursday morning. An estimate of the loss is not yet available.

The sum of \$1600 has been sent to the widow of Constable S.O. Lawson, who was murdered at Coleman, Alta., two months ago, according to an announcement made by Commissioner Bryson of the A.P.P., Thursday. Of this sum, \$1,200 was raised by the force, while \$400 was received from an unknown donor in Calgary.

After spending ten days and nights without food or fire in the wilds between Rocky Mountain House and Horburg, T. B. Moran has turned up, and is none the worse for his experience.

Judgment in the proceedings instituted against the former president of the Merchants Bank, which was expected to be delivered today, has been postponed.

There is no confirmation of the report that the Marquis of Fitchfield has been offered the military secretaryship to Baron Byng, governor-general of Canada.

Announcement is made that the New York Trust company has shipped \$500,000 in gold to Montreal. More than \$15,000,000 was crossed since the last month.

Continued Republican control of the United States congress, but with a senate majority cut in two and a house majority of 160 slashed to a scant handful, appeared Thursday as the net result of Tuesday's congressional elections, with returns almost complete.

Commerce is completely paralyzed throughout Asia Minor. One by one the banks of Smyrna are closing and the Kemalists have seized the vaults of most of the banking institutions because they would not furnish the Nationalist authorities with lists of their Greek and Armenian accounts.

Dr. Eugene von Knilling of the German People's party, has been elected premier of Bavaria.

The troubled state of affairs in Constantinople may not be getting any worse, but there certainly seems to be no improvement in good feeling between the Kemalists and the allied high commissions.

CONDOR NEWS

(Too late for last week)

The tearing of saws, the pounding of hammers, the swishing of planes, the shouts of teamsters hauling stones and gravel, are the principal sounds heard around that hive of industry, Condor, these days.

Mr. Scott Hastie's new store is being rushed to completion, with Mr. Page in charge. The material for the elevator is being placed on the ground as fast as teams can haul it, and the erection will be well started before this is in print.

The debris of the burnt store has been hauled away in preparation for the foundation of the community hall, and Mr. McFaul expects to start his new blacksmith shop in the near future.

In addition to all this there is a steady stream of grain being hauled into cars at the loading platform, and the usual quota of cattle and hogs being shipped to Calgary and other markets.

Mr. L. Hornett, of Vancouver, is visiting his daughter, Mrs. H. Meeres, Mr. Rasmussen, of Yakima Valley, Washington, is visiting his son. Mrs. Scott Hastie and Stewart Meeres attended the school teachers' convention at Lacombe.

MILK IS ESSENTIAL

TO GOOD HEALTH

Plenty of Milk for Children Means Plenty of Tone, Brawn and Blood

Milk is our best all-round food. There is no substitute, it is the most perfect food we have. Despite the fact that it is one of the cheapest foods, even at the present prices, it is the most difficult of all foodstuffs to collect, handle and transport. It requires the greatest care from pasture to pail and from pail to palate. Milk tastes good, it is easily digested and is very nourishing. It makes bone, brawn and blood. In fact, it has been said without exaggeration that the vigor and success of a nation depend largely upon the amount of milk it uses. Like all good things, milk

MAGIC BAKING POWDER

Magic Baking Powder has been known and used all over Canada for more than 25 years. It has set and maintained the standard for goods of its class. Its use is increasing daily because of its strength, purity and universal satisfaction. Pure food insures good health. Magic Baking Powder insures pure food.

CANADIAN MADE
EWING LITTON COMPANY LIMITED
TORONTO, CANADA

has a few drawbacks, but these are outweighed by its advantages. Drink more milk and use it safely in cooking.

Milk is the best food we have. There is no substitute. Save on other things if you must, but not on milk. You cannot afford to do without it—growing children especially need plenty. Buy at least half a pint of milk a day for each person in the household. No other food can take its place. Use it all; do not waste a drop. Milk looks like a simple fluid, but really it is very complex. A glass of milk contains a mixture of all the important things that make up a mixed diet. One can get the same nourishment from milk as from a meal made up of meat and eggs, sugar and cereals, oils and fats, with salt and water.

Milk is good fuel, because it contains fat and sugar. The body needs fuel to keep it warm and to make it move and work and play, just as the steam engine needs coal or the automobile needs gasoline.

One quart of milk is about equal in fuel value to any of the following: 2 pounds salt codfish, 3 pounds fresh codfish, 4 pounds beef, 5 pounds turnips, 1 1/2 pound butter, 1 1/2 pound wheat flour, 1 1/2 pound cheese, 3 1/2 pound lean round beef, 2 pounds potatoes, 6 pounds spinach, 7 pounds lettuce, 4 pounds cabbage, 8 eggs.

One ordinary glass of milk is about equal in food value to: 2 large eggs, 1 large serving of lean meat, 2 moderate-sized potatoes, 5 tablespoonfuls of cooked cereal, 3 tablespoonfuls of boiled rice, or 2 slices of bread.

Food is more than fuel—for food

also repairs waste, helps growth, builds flesh and bone, and keeps this. That is, milk is a good food, not only because it is a good fuel, but also because it has life-giving properties. Milk is both fuel and food.

Children Need Milk

Milk contains a great deal of lime. Children need lime every day to keep their growing bones and teeth. Milk contains lime in a form that is easily changed in the body to bone. Big boys and girls, and even grown people, need lime, because the bones are always wearing away. Little by little, and this wear and tear must be replaced. Lime helps build bones and makes them strong.

Milk Is Not a Drink

Milk is not a beverage. It should not be used to quench thirst. Milk is a food. It should be eaten, not swallowed quickly. Take small sips and roll it about the mouth and enjoy it as it goes down. Think how slowly nature furnishes milk to the suckling. It takes a baby twenty minutes to get a few ounces of milk from the nipple. Imitate nature—do not gulp down a glassful of milk—drink it slowly; eat it. This way you will prevent hard and indigestible curds forming in the stomach.

Grown-up people can live for months and months on milk alone, but a hard-working man would have to get a few ounces of milk to keep up his vitality and repair the wear and tear of his body. However, if milk is used in combination with other food, one is sure of getting a well-balanced ration. One pint of milk will serve this purpose for grown-ups—children need a quart. Children must have milk—adults ought to.

Souring and Curdling of Milk

The souring and curdling of milk is wrongly called nature's danger signal. Nature has no danger signal for milk. The dangers in milk cannot be seen with the naked eye. Our sense of taste and smell are poor sanitary guides. Curdled milk may not be harmful, and is often beneficial.

Usually when milk is allowed to stand it turns sour and curdles. This is the usual way of milk to spoil. This curdling is a special form of fermentation. It is caused by an acid which is formed by lactic acid bacteria. Strong acids like sulphuric acid will curdle milk at once. Weak acids like lemon juice will also curdle milk.

When milk curdles, very much the same thing takes place as when an egg is heated—the albuminous matter is made hard, lumpy, and insoluble. The curd is the thickened albumin of the milk.

Rennin also causes milk to curdle. This is the ferment found in the gastric juice; hence, the first thing that happens to milk when it reaches the stomach is to become curdled. The curd is then acted upon by the pepsin and digested. If the lumps are large and tough, the digestion is slower than if the lumps are soft and small. Therefore, drink milk slowly.

Price of Milk

Milk is cheap, even at present prices. It is too cheap that the housewife is inclined to cut down on milk when the price goes up. It is poor economy to save on vital foods. It is not how much we pay, but how much we get in return that counts. Thus, forty cents' worth of milk does the body more good than fourteen cents' spent on steak at forty-eight cents a pound, or fourteen cents' worth of eggs at fifty cents a dozen. At these prices, milk would be worth over forty cents a quart.

To go without milk is poor economy.

only. You get more energy (force) from twenty-five cents' worth of milk than you can from twenty-five cents' worth of meat, or eggs, or cod. Hence, it is better to eat life-giving milk than to eat meat on meat before you do so on milk.

The reason for the higher price of milk is the higher cost of everything including fodder, farm labor and transportation. When the price of milk went up a few cents it was a great mistake for many families were found giving their children tea and coffee instead of milk. This is a great mistake, for such drinks fail to nourish the child properly.

Life in Milk Vitamins. Milk contains "life" because it is rich in vitamins. Vitamins are vital substances of great importance in our diet. Vitamins are also found in other foods, but in very small amounts. These peculiar substances were recently discovered. They are absolutely necessary for the growth and nourishment of the body. Therefore, vitamins are indispensable to everybody, but particularly to growing children and to persons recovering from illness. The easiest way to get vitamins is in milk. Heating does not hurt the vitamins in milk. Hence pasteurized milk is just as nourishing as raw milk.

Milk has everything needed in the diet. It is a complete mixed diet in itself. It has sugar and fat which give energy (force) to move the body—like coal to the engine. It has mineral salts which build up the bones and keep the body in good shape; and albumin (protein)—like meat, milk or white of egg—is important in making brawn and sinew.

Of all the different kinds of food to be found in food, the best is found in milk. Sugar, mineral salts, fat, and protein are all necessary in a well-balanced diet. But these substances without vitamins will not nourish the body or promote growth. Milk is rich in vitamins. Drink more milk.

Have you ever actually realized the importance of materials in all fashions?

Butterick Design 3963—Shirt and blouse, strapless of wool material. The blouse finished in a color crepe. It has endless possibilities.

Butterick Design 3967—There is nothing more effective than the draped front and blouse back of this charming one-piece slip-over design.

MATERIALS and fashions this Fall seem almost made to order for home sewing, with the vogue for simple drapery, so easy to do, and so very effective in the soft textures of the new woolen materials. Then the silks and crêpes—never were they softer and lovelier.

How many times have you been disappointed because you saw a dress you liked, but couldn't get it in the color you wanted! Or perhaps you liked the color, but you couldn't get it in the materials you wanted.

Our dress-goods department will solve these difficulties. Come, see for yourself its very large variety of colors and materials, showing the newest weaves and designs for Fall. Then look at our Butterick Patterns with the Deltor, and baffle all thoughts of not being able to make your clothes yourself.

No need to limit your Fall wardrobe because of too little money or time!

IT SOUNDS like some sort of magic, doesn't it? And yet it is quite the simplest thing you could imagine, because of the Deltor, which comes with every Butterick Pattern. You save material (and material means money!) when you follow the Deltor cutting layout. You save time when you follow the Deltor pictures for putting together your particular pattern. And the Deltor shows you how to finish your garment in an entirely professional way!

As for fashion—if we tell you that at 27 Avenue de l'Opera, more Butterick Patterns are sold than at any other store in the world, you will appreciate how very close Butterick Patterns are to the dictates of Paris. The identical time the new patterns are being presented in Paris, we are presenting them here. So your choice is the same choice as the best-dressed women in Paris.

BRUMPTON and GAETZ, Ltd.

ROSS STREET

RED DEER

Butterick Design 3969—The loose side panels on this slip-over sweater dress add a touch of becomingness to its correct fashion.

Butterick Design 3979—A delightful example of the low waistline and the draped skirt, both features of the newest fashions.

OPTIMISM

What Red Deer wants is a little more optimism. When I. J. W. Gold visited our city last week from P.C., he was struck with astonishment at the attitude of most of our citizens. They were all down in the dumps, and could hardly speak cheerfully, or see one glimmer of hope for the future. He said it was like a plague, and everybody had it. He said he had travelled all over Saskatchewan and B.C. in recent months, and there was not a spot he could prefer to live in compared to Red Deer. He had everything to make a first class city, and yet nobody seemed satisfied. He had been living in P.C. for some years for his health, but he had better health while living in Red Deer than he had in P.C.

In this connection we draw our readers' attention to an article on our front page descriptive of Red Deer only a short 21 years ago, to show our tremendous growth since that time, and that while we may be depressed at the present time, we are as sure to rise again as the sun is to rise tomorrow morning.

At that time we had no water service; we had no sewerage system; we had no electric light; we had no cement sidewalks; we had no large school, or city hall, or fire department, or agricultural grounds. The C.P.R. had one passenger train a day. In the Old Country there are many towns a hundred years old that have not grown as much as Red Deer has grown in twenty years.

We hope our better citizens will help to dispel the gloom that is being scattered broadcast by turning their faces to the sunlight and making the future bright for everybody.

THE PROGRESSIVE PARTY

The meeting of the Progressive Party at Winnipeg last week, was of considerable interest and importance. The issue raised was practically that of the continued independence of the Farmers' Party or its fusion more or less complete with the Liberal Party. For the moment the question of the choice of independence has been made, but the Farmers' Party remains in its previous rather precarious position.

Possibly, however, the most notable feature of the gathering was the suggestion contained in Mr. Cramer's letter of resignation that the Party ought to broaden its basis and not to restrict its membership to farmers only. From the point of view of both the Progressive Party and the country this seems wise advice. As long as the Farmers' Party admits non-farmers to membership, it cannot expect the community as a whole to regard it with sympathy. Its programme almost necessarily will tend to be one favouring merely class legislation and class interest to the exclusion if not to the detriment of other sections of the community. Such a tendency will in turn incline to the creation of sharp and antagonistic class distinctions, which Canada has hitherto been happily free from. It is not by the acceptance of divisions in the community but by the promotion of constructive co-operation, that progress is likely to be made. The farming interest is now and is likely to remain for long the predominant interest in the West and in Canada generally. It is right and proper that the interests of the farming community should be guarded. If the farmers are to be exploited by the people of the towns and deprived of their returns for their work, farming will cease to be a healthy industry, and the rest of the community will suffer the effects of that loss of health. Moreover, the farmers themselves will inevitably lose by an exclusive policy. If they, as a party, look only to their own interests and ignore or subordinate those of the rest of the com-

munity, individual members of their party will quickly learn the lesson of selfishness and will in their turn ignore the interest of the party and consider only their private advantage.

As a result incidents like the recent indemnity vote will tend to become more common, and the general standard of public life will move downwards rather than upwards.

There are two absolutely opposed attitudes which may be taken up by individuals towards the country and the community. The country may be regarded as something to which we owe a duty of ungrudging and self-sacrificing service; or it may be regarded as something to be robbed and preyed upon by every means fair and foul. The two attitudes are far apart in conflict. The one makes for an efficient and prosperous nation or community. The other makes for a corrupt and decadent one. We like to believe that the former and better attitude is the one typical of British communities, but the tendency to the other and worse one is always present in human nature and always to be guarded against.

We may not agree with some points in the Progressive Party's general policy, but there are always two sides to great public questions, and the existence of the system secures as a rule full discussion. It is to the interest of the country as a whole that our great parties should be as healthy, broadminded and disinterested in their outlook as possible. Therefore the favourable reception of the advice given to his party by Mr. Cramer is a matter of general interest to everyone.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Government Buildings, Edmonton.

Opening of House Postponed

The opening of the Legislature, which was billed to take place on December 7, will not now be held until January 23, owing to the fact that Premier Greenfield will be engaged in the conference on natural resources at Ottawa for the last two weeks in November, and that the government is not quite ready with its program for the session. The Premier is anxious to go into the session fully prepared to proceed with legislation. The date of January 23 is ten days earlier than the date of opening last spring.

Druggists Relieved of Liquor

Druggists in the four cities of Edmonton, Calgary, Lethbridge and Medicine Hat, are to be relieved shortly of the responsibility of the sale of alcoholic stimulants, according to an announcement by Attorney General Brownlee. The sale of liquor in these cities will henceforth be conducted solely by government vendors. This will necessitate the appointment of vendors in Lethbridge and Medicine Hat. In towns and outlying points druggists will continue to dispense liquor on prescriptions, but the quantities will be reduced to six ounces in bottles sealed and supplied by the government.

Inspect New Line

Several members of the government, accompanied by officials of the railway department and others, made an inspection trip over the new extension of the Lacombe and Hillman Valley Railway west of Lacombe last week. Service on the new extension, which runs to the

terminus of Highway 12, miles beyond the former terminus, will be inaugurated November 12.

Auto License Plates

Forty-two thousand new auto license plates for the province have been ordered for 1923. These will be made with white figures on a blue background. Nearly 40,000 auto license plates were issued during the present year.

Live Poultry Shipped East

For the first time in the history of the co-operative poultry marketing service a carload of live poultry was shipped out of the province by the marketing service of the Provincial Government, with the cooperation of the Dominion poultry officials. The car was shipped to Montreal. If the experiment is a success, other shipments may be made to the eastern market.

New Triumph for Phone System

Edmonton people are now able to talk to those in Salt Lake City, Utah, 1100 miles away, as a result of satisfactory phone connection established the past week between the Alberta Government Phone system and the Mountain States Telephone system, which serves southern Utah and northern Arizona. It is now possible to talk long distances on a thousand-mile circuit from Alberta to the west coast. Connection was made at Coon's a few days ago, and a conversation held between Edmonton and Helena, the capital of Montana.

To Chicago Show

W. J. Stephens, crops commissioner of the provincial government, will leave shortly for Chicago for the purpose of looking into the possibilities of marketing the pure seed grain now being received for re-cleaning at the government cleaning plant in the east end of the city. Mr. Stephens will also attend to the grain show at Chicago, and will re-lease the Alberta exhibits from the customs and place them in a proper order for exhibition. He will also see that these samples are returned to the exhibitors where such request is made.

Miss Tilley, lecturer for the women's extension branch, is now on an itinerary of lectures through the rural districts, giving instructions in dairymaking. Her itinerary includes the following points: Hillsdale, Nov. 13 to 17; Bowden, Nov. 21; Eagle, Nov. 22; Westford, Nov. 23; Sundre, Nov. 24; Lethbridge, Nov. 27 to Dec. 1; Mountain House, Dec. 2; Crossfield, Dec. 5 to 9.

Grading of Hops

Grading hops according to Dominion government standard is now in effect at the stock yards and packing house at Calgary. The new grades are as follows: Grade 1, select, from 160 to 210 pounds, premium of ten per cent; Grade 2, thick smooth, 160 to 210 pounds, basic price; Grade 3, shop hop, 120 to 160 pounds; Grade 4, heavies, 210 to 260 pounds; Grade 5, extra heavies, over 260 pounds.

Grade 6, light and feeders, 170 pounds and down unfinished. Grade 7, rough, any weight. Grade 8, extra heavy, up to 350 pounds; B, all other soya. Grade 9, stags.

Future for Tar Sands

G. J. Hammond, of San Francisco, whose company has developed a satisfactory method of extracting oil from the tar sands of Fort McMurray, Alberta, has been in Edmonton, Alberta, and states that his company is preparing to operate on an extensive scale, and that a refinery may be built in Edmonton to handle the product of the tar sands.

BROKE CALGARY AND EDMONTON RECORD

It has remained for an Alberta driver and a Canadian made car to set an American dirt road record that will probably live for many a year. The stunt was performed Sunday November 5, when J. Paul Welch, in a McLaughlin Buick Master Four, broke the record for the trip from Edmonton to Calgary and return, 415½ miles, in 3 hours, 24 minutes and 50 seconds. The time included two stops at Red Deer for gas, totalling 2 minutes, stop at Calgary for registration, 3 minutes, five minutes for lunch through a pancake, and the period consumed through losing the trail from Calgary and retracing the route. The ten miles travelled in this manner is not included in the mileage from Edmonton to Calgary and return. Mr. Welch was accompanied on his trip by Steve Playford. The fastest time was made from Edmonton to Calgary, 4 hours, 32 minutes; the return trip took 4 hours, 18 minutes. The trip from Edmonton to the trail and the pancake. The fastest the car travelled was 68 miles per hour and the slowest 15 miles. Turns were made at 35 miles an hour by the expedient of turning the front wheels sharply and locking the rear ones, a practice which Welch does not recommend for amateurs.

The common stock motor of the Master Four performed perfectly, declares Welch, living up to a trial that should never have been asked of it. The car itself was 5 feet in the air after some of the bumps, taken at 60 miles an hour, but that strain was minimized by the Hartford shock absorbers with which the car was equipped. On the return home there was not a rattle in the machine.

TEACHERS' CONVENTION AT LACOMBE

The annual convention of the teachers in the Lacombe and Red Deer inspectorates was held in the St. Andrew's United Church, Lacombe, November 2 and 3, 1922.

From 1 o'clock (all 1:30 registration) the teachers, along with the president, Mr. G. K. Sheane, in the chair, and 136 teachers in attendance, the meeting was opened with the singing of "O Canada," followed by the invocation delivered by Rev. Love.

The teachers were welcomed to Lacombe in an address given by Dr. Simpson, on behalf of the Town Council, which was followed by an address on behalf of the School Board by Dr. Simpson.

Miss F. M. Milne read a paper given by Miss D. J. Dickie to the Edmonton Teachers' Association on the course in English, giving a brief review of the aims, material within and objects of the course. After a brief discussion, it was moved and seconded that the Convention approve the course.

The discussion on the revised Grammar course was also introduced and dealt with by Inspector Gibson of Red Deer, and the Convention resolved that a fair trial of the course should be made for one year before any criticism was made known.

Mr. MacKenzie, principal of the Red Deer Public School, introduced the revised history course discussion and dealt with its various phases. A like resolution to that of the Grammar was passed by the Convention. The meeting was then adjourned.

The evening session commenced at eight o'clock, with president Sheane acting as chairman. Some musical numbers were enjoyed. The violin solo—Miss Myrtle Cochran, Quartette—Mendham Sheane and Firth, Maud Smith and Reid. Violin duet—Misses Goulay and Cochran.

Following this came one of the most entertaining and educational lectures delivered by Prof. MacPhee, lecturer of psychology U.O.A. Prof. MacPhee took for his subject "Juvenile delinquency, its kinds, causes and some dwelling at some of the causes of the necessity of instituting some system for the maintenance and care of the delinquent. A vote of appreciation was expressed by the Convention at the close of the address.

November 3rd

The Convention assembled at 9 o'clock in the Lacombe school and there divided into sections. The High School section, with Mr. Sheane in the chair, held discussions on common sense, the correction of faults, and comparisons of difficulties in all branches of their work.

The Public School section, with Mr. MacKenzie in the chair, listened with interest to a paper of Miss Burnett's on the psychology of the child, and the Rural School section, presided over by Inspector Gibson. Inspector McGowan gave an interesting and concise paper on elementary science in Lethbridge schools, followed by a paper by Mr. McFarland on science in High School grades for country schools.

The meeting then adjourned. Meeting in school, the Convention listened to an excellent address by Mr. R. W. Hedley, of Edmonton, on the revised course in art. Mr. Hedley dealt very fully with the course in every particular, pointing out the necessity of gauging a child's ability more with an appreciation for color and space than he has been taught than with his natural tendency to copy and imitate.

The business meeting for the year was then held, and after a vote of appreciation to the executive and citizens of Lacombe for their part in making the Convention a success, the regular business of dissolution was transacted, because in the future

each inspectorate will have separate conventions, and the convention then adjourned.

Resolutions of Convention

Resolved: That the course in reading, literature and composition be approved. That the course in grammar be given on a year's trial before criticism is asked for.

That the course in history in Grades VI, VII, VIII, be modified so as to be more biographical and more chronological and more definite. That the examination requirements in Grade VIII history be specified more fully. That the arithmetic course be satisfactory.

That the geography course be approved.

Resolved: That the Department provide a set of travelling physics apparatus for Grades IX and X, to each inspectorate for rural schools.

Resolved: That the Department provide material for distribution to all schools in manual arts.

—IT COSTS LESS—

This Store's Policy

The policy of this store has always been to sell merchandise at the lowest possible prices. We believe that every article sold should bear a certain percentage of profit, and not that one article should be sold at an excessive price, in order that another article can be sold at cost.

Our prices are based always on present-day costs, irrespective of the original costs, and in consequence our customers are assured that whenever and wherever they buy they are not paying more than a FAIR PRICE. We invite comparison of our prices with others.

SHOPPING ADVANTAGES.—An efficient and courteous staff is backed by the largest and most desirable stock we have ever had and we believe our prices are comparatively lower. While we never buy cheap or shoddy goods to make attractive prices, we are rarely undersold, and we are always willing to guarantee everything we sell, determined to give our customers full value for every cent spent in our store. Under this policy and the Cash System, our business grows steadily.

HARDWARE

Crown Door Track and Hangers.—The wheels are fitted with case-hardened steel roller bearings, and are protected from the weather by the housing of the hanger. The guide underneath prevents it from coming off the tracks.

MEN'S OIL TANNED PLOW BOOT, Sizes 6 to 12. Special \$3.25 Pair

Gossard Brassieres

Gossard Brassieres, like Gossard Corsets, are unerringly designed for the needs of the nine figure types. The new Longeryne models are priceless to the woman who heretofore has been unable to find brassieres with special shaping to support and flatten the diaphragm and with extra length to prevent them from slipping over the lower tops of the modern corsets.

Are You Large Above the Waist?

THE right Gossard Brassiere to place the curve of the breast and conceal fullness without appearing to constrain; the right Gossard Corset to magic away extra fullness at the shoulders, and comfortably take care of the diaphragm—if you don't know these beauty aids you don't know how well you can look.

Understanding your type is one of the most important aids to beauty you will ever find. Remember that whatever your figure may be there are Gossard Corsets with just the support you need at your age and weight to comfort such as you never knew before. Gossard trade marked Corsets as low in price as \$2/50

\$2.50, \$3.50, \$4.50, \$5.00, \$5.50, \$6.00, \$6.50, \$7.50, \$8.50

Big Valley Coal

SO EASY TO BE WELL AND STRONG

Take "Fruit-a-lives" The Wonderful Fruit Medicine

305 CAVENDISH ST., MONTREAL

"I suffered terribly from Constipation and Dyspepsia for many years. I felt pains after eating and had gas, constant headaches and was unable to sleep at night. I was getting so thin that I was frightened.

At last, a friend advised me to take "Fruit-a-lives" and in a short time the Constipation was banished, I felt no more pain, headache or dyspepsia, and now I am vigorous, strong and well."

Madam ARTHUR BEAUCHER.

Box a box, 6 for \$2.50, trial size 25c.

At dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

EXAMINER'S REVIEW OF 'PROVINCIAL MARKETS'

(Calgary, Nov. 9)

CATTLE—

Beef—Calgary market mostly drab this week, though there were a few tops. Choice heavy steers, \$4 to \$4.25; choice light, \$3.75 to \$4; good, \$3 to \$3.50; medium, \$2.50 to \$3; common, \$2 to \$2.50. Choice cows, \$2.50 to \$3; good, \$2 to \$2.50; medium, \$1.50 to \$2; common, \$1.25 to \$1.50; canners, \$1 to \$1.25. Choice heifers, \$3 to \$3.25, with a few tops over that; good ones from \$2.75 down; common, \$2 to \$2.50. Bulls, choice, \$1.75 to \$2; common, \$1.25 to \$1.50; others down to \$1. Calves largely taken as feeders; choice heavy, \$3 to \$3.50; common, \$2.50 to \$3; others, \$2 to \$2.50. Feeders and Stockers—Choice feeders somewhat easier at \$3.50 to \$3.75; common feeders, \$3 to \$3.50. Stocker steers, \$2 to \$2.50; stock heifers, \$1.50 to \$2; stock cows, \$1.25 to \$2.

Beef—Edmonton prices keeping up and some top steers over last week but range. Choice heavy steers, \$4 to \$4.25; choice light, \$3.75 to \$4; good, \$3 to \$3.75; medium, \$2.25 to \$2.75; common down to \$2. Choice cows, \$2.50 to \$3; good, \$2 to \$2.50; medium, \$1.75 to \$2; common, \$1.50 to \$1.75; canners, \$1 to \$1.25. Some choice heifers make \$3.25, but most good ones, \$2.75 to \$3; common, \$2 to \$2.75. Calves unchanged, with best at \$2; others, \$1.50 to \$2. Bulls unchanged, with choice, \$1.75 to \$2; others spreading down to \$1. Feeders and stockers—Choice feeders will bring \$3.75, and good ones are \$2.25 to \$2.50. Stocker steers in wide range, according to quality, at \$1.50 to \$3. Stocker heifers and cows not in much demand locally; heifers, \$1.50 to \$2; cows, \$1.25 to \$2.

HOGS—

Calgary prices steady this week at \$9 for thick smooth, very few bacon hogs to get premium; shop hogs, \$8 to \$9; heavy, \$5; sows, \$5 to \$6; lights, \$4 to \$5.

Edmonton prices have been good during the week, with thick smooths at \$9 to \$9.15, and few grading as select bacon.

SHEEP—

Market at Calgary not so good on lambs, with sales this week, \$7 to \$9.50; wethers, \$6 to \$7; ewes, \$3 to \$5.50.

Sheep have been firm at Edmonton, with lambs up to \$10; wethers up to \$7.50 and fat ewes from \$6.50 down, and stock ewes, \$3.50 to \$4.50.

GRAIN—

Hollies on the Canadian and American markets this week did not tend to liven business very much, but trading has been fairly satisfactory, and reports of sales of U.S. wheat and rye to Greece and Germany have been encouraging. One of the serious drawbacks to Canadian shipments is the exorbitant prices which are being charged for shipments out of Port William and Port Arthur, which are nearly three times over normal.

PRODUCE—

Eggs—Good demand and premiums on special and extra grade eggs, but most shipments by case grading down far below these standards; No. 1, 25c and 26c; No. 2, 19c and 20c; some cart of storage going east. Creamery butter—Cartons unchanged at 36c to 41c, on two grades; bulk, 36c and 35c; receipts falling off. Cheese—Advanced to 22c to 25c. Poultry—Unchanged, with receipts this week lighter; hold birds unsold as well as possible; live chickens, 10c to 12c; fowl, 8c to 10c; ducks and geese, 8 to 12c; turkeys, 12c to 15c; dressed fowl about 6c, over live price; dress and ship carefully to get best prices. Potatoes—Only local business; ample offers at Calgary at \$16 and \$18.

Wool—

Week very quiet in hay trade; prices unchanged; market hard to quote owing to varying local conditions; Calgary dealers report \$10.50 to \$17 for upland at country points; round feed, \$10 to \$11.

HIDES—

Prices unchanged, but eastern market weaker, and may be reflected here later; green salted butcher hides, 9c; kip, 9c and 10c; calf, 10c to 12c.

FURS—

Nothing much doing in furs; prices unchanged and likely to hold until more furs moving.

MR. BROWN ANSWERS

MR. WILTON

The Editor of the Red Deer News:

Sir:

In your last letter there appears a letter from Mr. Amos Wilton that shows what a brave man he is. Not that I would make any effort to change Mr. Wilton's mind, as he declares that it can't be changed, and in fact it is in the interest of prohibition that it should not be changed, so long as he keeps on writing letters like his last one. His letter is the nearest to a dangerous gossip that I have read for a long time. He accuses me, not by name of course, and in this way saves himself from libel, of engineering the whole thing from start to finish. By this he means that I know all about the letters written by A. W. Martin and helped him to write them, suggested a debate, etc. Now, sir, what is the truth, because other people might be interested to know the truth, though Mr. Wilton apparently is not concerned about the truth, judging by his letter. The truth is that I thought all the time that the writer of these breezy and well written letters, George Ridgewood was Angus, the son of the late Angus Martin, and I did not dream that it was his grandson till one day A. W. met me on the street and asked me what I thought of his letters, and it only then dawned on me that he was the author of them. From beginning to end he did not ask me for one suggestion or idea, and I think it was before he wrote the last or second last letter that he spoke to me about a place in which to hold the debate or some matter about the arranging of it; I have really forgotten which it was. The truth is that I had one of the smallest little parts to do with A. W. Martin's letters or plans, and he does not need my help in any particular. Not satisfied with this, Mr. Wilton then goes on to diagnose my theological teaching. I do not suppose that Mr. Wilton ever heard me preach a sermon in his life, and he says that he never will, so of course he is a man with a very open mind. Such a student ought to keep off writing letters as long as he can find people who have no regard for the truth to read this pouring out of his own bile. What passes my understanding is how any man in his right mind can be capable of doing such things, and what he is trying to get at or what interest he is trying to serve. As far as my theological teaching is concerned, I wouldn't think of paying any attention to Mr. Wilton's fair tales, which he has evidently gathered from some gossip. When I read the letters between Mr. Wilton and me, I thought of the pleasant that men must have when they see a cartoon of themselves in the paper.

If Mr. Wilton wants to know my theology, and doesn't want to hear me preach, I will be glad to give him private instructions, but I shouldn't have suggested that, because he has indicated that he has made up his mind on this too, so that he doesn't want to know, so what's the use. His statements re: increase in crime are about on a par for accuracy with the above. He doesn't even hint about the amendments to the criminal code about the \$35 criminals arrested for traffic in drugs. Of course he is trying to get out that prohibition has caused this, too. Some men would blame prohibition if the astronomers discovered a new spot on the sun. The unfortunate thing for Mr. Wilton when he makes this outcry in connection with the drug traffic is that out of the \$35 or more of the \$500 or more in the liquor selling provinces of Quebec and N.C. The old prohibition provinces of Prince Edward Island has not a single case of drug crime.

But I have taken far too much of your space already, and I would not have written you at all except that there are many people who want to know the truth, and for their sake and for the state's sake, I have said so much. If Mr. Wilton continues to write letters like his last one, I hope you will give him lots of rope.

W. G. BROWN,

The Manso, Red Deer, Nov. 7, 1922.

OAT HULLS A DANGER TO LIVE STOCK

When Their Inclusion to Feeding Stuffs is Legal and Usual

Oat hulls contain very little nutritive material for the feeding of live stock and are exceedingly difficult to digest, points out circular No. 1, just issued by the Seed Branch of the Dominion Department of Agriculture. In fact, the circular goes on to say, feeds containing a high percentage of hulls have not infrequently been blamed for causing injury and even death to live stock. Happily since the passing of the Feeding Stuffs Act in 1920, the fraudulent use of oat hulls has been gradually checked, and at present few manufacturers take the risk of using them in an unlawful manner. This is proved by a statement in the Circular that the percentage of oat hulls used in samples submitted to the Ottawa laboratory from various sources has fallen in the past four years from 59 percent, to 35 percent. A series of examples are given of the illegal use of hulls in samples taken at random from the received the ordinary way of the Dominion Department of Agriculture. In fact, the circular goes on to say, feeds containing a high percentage of hulls have not infrequently been blamed for causing injury and even death to live stock. Happily since the passing of the Feeding Stuffs Act in 1920, the fraudulent use of oat hulls has been gradually checked, and at present few manufacturers take the risk of using them in an unlawful manner. This is proved by a statement in the Circular that the percentage of oat hulls used in samples submitted to the Ottawa laboratory from various sources has fallen in the past four years from 59 percent, to 35 percent. A series of examples are given of the illegal use of hulls in samples taken at random from the received the ordinary way of the Dominion Department of Agriculture. In fact, the circular goes on to say, feeds containing a high percentage of hulls have not infrequently been blamed for causing injury and even death to live stock. Happily since the passing of the Feeding Stuffs Act in 1920, the fraudulent use of oat hulls has been gradually checked, and at present few manufacturers take the risk of using them in an unlawful manner. At McPHERSON BROS. SALE

They Have Put The Axe

to the price of paint and lots of other things. We thought at the price we marked our paint every can would be gone before this. It is true we sold a lot of paint, but we still have a lot of good colors, in both inside and outside paint, left on our shelves. They have got to go; so have we; but we can't go till the paint goes first, so, as Archie Fyfe says, "For the love of Mike," come and get it. The price is ridiculous—think of it—regular \$5.25, for \$2.95 a gallon. We can hardly look at a can of Stephen's Paint in the face without blushing, to think of putting such a low price on such good paint. Stephen's Paint has been known and used in this country since houses were first built here, long before the U. F. A. was ever heard of, in the days when the West was populated with Grits, Presbyterians and Indians. It is still the same good old paint, and we are offering it to you for \$2.95 per gallon. Nobody with any sense is going to give you a price like that again for a long time. If you have any painting to do within a year from now, buy your paint now, and buy it quick or somebody will beat you to it. Inside Paint, Shingle Stain, Barn Paint, all cut away down just like the house paint. Read the list.

Standard Kalsomine, reg. 75c per pkg. Sale 35
Stephen's House Paint, reg. \$5.25 per gal. Sale **\$2.95** gal.
Stephen's Barn Paint, reg. \$3.50 per gal. Sale **\$1.65** gal.
Stephen's Shingle Stain, reg. \$2.80 gal. Sale **\$1.50** gal.
Auto Enamel, reg. \$3.95 per quart. Sale **\$1.50** quart

THE TRACK-BUYER'S VIEWPOINT

To the Editor of The News.

Dear Sir,—
I am glad to notice that a large number of the farmers of the district have at last seen the light, and by their patronage, are showing the value they are putting on having a track-buyer in their midst. These men are co-operating with me for the good of the whole district, by keeping up the price of grain at this point. I have always maintained that the farmers' organizations, instead of making so many "resolutions," or "revolutions," would put a good track buyer at every point to see that they got a decent price for their grain, they would be a lot further ahead. I myself, along with thousands of others, had thought that the U.G.G. line of elevators was for this purpose, but many of us, to our sorrow and pecuniary loss, have found it much the reverse. There are still some farmers who are taking advantage of their fellow farmers and myself by marketing their grain the easier way of the elevators. The elevator men are giving these fellows the last cent in a final endeavor to put the track buyer out of business. However, as he survived last season, he certainly expects to this one, and my following one as well. I have a limit to my prices, and I do not intend to overstep this limit. Those who are standing in the way of my price, and are willing to take the same or less than the elevators are paying to keep me in business and load their grain on cars into the bargain. When they see the prices I am paying, compared to those listed by the elevators, they realize that no banks or mortgage companies could ever have ravaged the farmer's pocketbook to the extent that the elevator companies have done by their fixed list price. These companies pay above this price, they stick firmly to it, and as a rule pay a lower grade also. I have been paying 7 to 8 cents a bushel over this list price, and I consider that it is the duty of every farmer to stand by me. Let those that wish to store grain or market it in carloads, put it through the elevator. This is what they are there for. The man with the small crop, marketing by the load, should sell to the track buyer, who gives him nearly carload prices. By the wagon load, I might mention at this point that some farmers are hauling grain to me from the Innisfail district, where there are four elevators, through Fumhold, where there are two more. This is an absolute proof that the elevators are not paying any more than they have to, and not endeavoring to amass a fortune out of the farmers. Anyone with any sense at all knows this. The men working with me and myself only make small wages for the work we do. On the other hand, I do not wish to hold myself up as a hero, but rather as a common and garden plug, who is just trying to put a few extra dollars into the farmers' pockets, at a time when they need them most, in the hope that they will remember it and spend a few more when they need anything in our line. I hope they will remember the many dollars they have gained on each load of grain, and not let an odd one stand between them and business with us. Hoping to be able to keep in the grain business year by year, and thereby benefit the district in general, I remain,
Yours very truly,
C. L. H. WALDE.

Stock Exhibit from Alberta

The second annual exhibit of steers for the eastern stock shows, from the college of Agriculture of Alberta, left the past week in charge of Prof. Sackville, who replaced Prof. Dowell as professor of animal husbandry. The exhibit will go first to the Royal Show at Toronto, then to the International Show at Chicago and afterwards to Guelph. The steers were contributed to the shipment by the following breeders in the province: Short horns by T. B. Ralphs Aldridge, J. L. Walters, Clive, J. G. Clarke, Irma, Chas. Yule, Carlisle, Wm. Sharpe, Lacombe, J. H. McArthur, Milnerion. Herefords by Frank Collicutt, Crossfield, Kinston Ranch, Camrose, S. M. Mack, High River, Simon Downie, Carlisle, S. D. Blair, Red Deer. Angus steers by Juggins Bros., Lloydminster, Dickson & Hunter, Innisfail, C. H. Richardson, Bowden, Thos. Henderson, Lacombe. In addition there is a Short horn steer from the Old Agricultural School, a particularly fine specimen, also a Hereford calf bred at the University, and two Short horn grades bred at the University.

NIGHT COUGH

CHESTS torn and made sore by an incessant night cough, are comforted and strengthened by Peps. When placed in the mouth, Peps dissolve away into powerful healing and germicidal vapours that are breathed straight to the lungs. Harmful germs in the throat are immediately destroyed and are inflammation in the bronchial tubes is soothed away, obstructions are softened and get rid of. In Peps you have the benefits of pine-forest treatment at home. Take them for a cough, cold or croup, for grippe, sore throat, infectious colds and bronchitis. All druggists and stores sell Peps at 5c. 10c and 25c per box, or send for FREE SAMPLE to Peps Co., Lambert Street, Toronto.

THE BEST CHRISTMAS GIFT

Christmas for the Boy!
Christmas for the Girl!
Christmas for the Father!
Christmas for the Mother!
Christmas for the family and all bound up in the 52 weekly issues of "The Youth's Companion" for 1923. No other periodical can take the place of "The Companion" at the family fireside—no other reflects so truly the home spirit.
The 52 issues of 1923 will contain from eight to a dozen serial stories, nearly two hundred short stories, besides sketches, special matter for the boys, the girls, the domestic circle. The Children's Page and the Doctor's Corner will, as they have for years, prove indispensable features of the paper. Subscribe now and receive:
1. The Youth's Companion—52 issues in 1923.
2. All the remaining issues of 1922.
3. The Companion Home Calendar for 1923.
4. \$1.00.
5. Or include McCall's Magazine, the monthly authority on fashions. Both publications only \$3.00.
THE YOUTH'S COMPANION
Commonwealth Ave. and St. Paul St.
Boston, Mass.
Subscriptions received at this office.

The British government has made an effective bid for popularity among the recipients of war pensions by its announcement given out by Major Tynon, minister of pensions. The minister dispelled the likelihood of a reduction of the rates next April in consequence of the decreased cost of living.
